PROFESSIONAL SUMMARY

AI Engineer and Full-Stack Developer with 4+ years of experience designing and deploying AI-driven applications, large language model (LLM) solutions, finetuned more than 20 LLM model on client dataset, and scalable backend systems. Currently leading a team of 8–12 engineers building state-of-the-art AI agents for diverse enterprise clients. Delivered 20+ agentic AI projects with rapid system design and architecture. Expertise in legacy code conversion across .NET, Java, C++ and JavaScript codebases with core specialization in Python. Proficient in building production-grade Node.js/Express applications. Skilled across the full Python, Java, and JavaScript ecosystems with deep knowledge of LangChain, LangGraph, NLP, computer vision, and DevOps. Proven track record of shipping production products including an AI text-to-speech platform (1,000+ users) and an AI resume screening platform.

PROFESSIONAL EXPERIENCE

Bayseian

Dec 2025 – Present

Lead AI Engineer

- Lead a team of 8–12 engineers in designing and developing AI-driven applications for diverse enterprise clients
- Architect and build custom AI agents tailored to specific business use cases using LangChain, LangGraph, and Google ADK; delivered 20+ agentic AI projects with rapid system design turnaround
- Drive legacy code conversion initiatives across .NET, Java, and C++ codebases to modern Python-based architectures
- Develop scalable, high-performance backend systems using Java, Node.js, and Express, optimizing APIs for reliability
- Build and deploy AI agents using no-code/low-code platforms including n8n, Make, and LangFlow

ReelsBuilder

Jun 2025 – Jan 2026

Senior AI Developer & Architect

- Architected full-stack AI-powered video creation platform generating short-form content for TikTok, Instagram Reels, and YouTube Shorts
- Implemented AI video generation system with 100,000+ clips, viral moment detection, and professional AI voiceover integration
- Built multi-platform publishing with automated formatting and AI transcript generation using NLP techniques
- Achieved 20,000+ active creators with average video creation time of 2 minutes

Convsync.co

May 2024 – Present

Senior AI Developer & DevOps Engineer

- Developed and maintained web applications using React, Angular, and Next.js with responsive, dynamic user interfaces
- Fine-tuned large language models and deployed AI-based applications with LLMOps best practices
- Built server-side applications and APIs using Java, Node.js, Express, FastAPI, Flask, and Django
- Applied Python for scripting, automation, and data processing; performed low-level C programming for system-level tasks

MedicalNao

May 2023 – Mar 2024

Mid-Level AI Developer

- Developed AI applications using FastAPI and Django for product-based healthcare projects
- Built prototypes and MVPs; applied NLP and computer vision techniques including data preprocessing and model evaluation

Meriti Inc.

Sep 2022 – Feb 2023

Junior AI Developer & Deep Learning Specialist

- Developed custom loss functions for model optimization; worked on image segmentation and classification tasks
- Gained hands-on experience in NLP and computer vision through freelance and internal projects

Upwork (Freelance)

May 2018 – May 2022

Web & AI Developer

- Delivered NLP and WordPress development projects; specialized in data preprocessing, model development, and plugin integration

SELECTED PROJECTS

LangVoice | Python, TTS, AI, SaaS

2025 – Present

- Built and launched langvoice.pro — an AI text-to-speech platform with 28+ natural voices, 9 languages, and sub-second latency
- Developed Python and JavaScript SDKs for seamless integration with LangChain, CrewAI, AutoGen, and OpenAI agents
- Grew platform to 1,000+ active users and 1M+ minutes of generated audio

ResumeWorld | AI, NLP, React, SaaS

2025 – Present

- Created resumeworld.app — an AI-powered resume screening and recruitment platform with 95% accuracy
- Enables recruiters to analyze 50,000+ resumes and save 40+ hours per hire through intelligent candidate matching

Metamod Corp | Python, React, DevOps, Azure

Jun 2025 – Present

- Designed agentic workflow platform enabling users to create AI-powered automation using natural language
- Implemented multi-agent collaboration system with intelligent orchestration, LLM integration, and real-time task execution

Dermatologist Chatbot | Python, VIT, Llama, RAG, GCP

Jun 2024 – Sep 2024

- Developed multimodal RAG chatbot using Vision Transformer for skin disease diagnosis and Llama for treatment recommendations

LughaatNLP Library | Python, NLP

Dec 2023 – Jan 2024

- Built specialized open-source library for Urdu language NLP: tokenization, lemmatization, POS tagging, NER, and spell checking

TECHNICAL SKILLS

Languages: Python (primary), Java, JavaScript, TypeScript, C, C++, C#/.NET, Rust, SQL, HTML/CSS

AI/ML: LangChain, LangGraph, CrewAI, Google ADK, PyTorch, TensorFlow, Keras, Scikit-learn, NLP, Computer Vision, RAG, LLM Fine-Tuning, LLMops, Agentic AI

Frameworks: React, Next.js, Angular, Node.js, Express.js, FastAPI, Flask, Django, Java Spring Boot

System Design & Architecture: Distributed Systems, Microservices, API Design, Legacy Code Conversion (.NET, Java, C++), Multi-Agent Orchestration

DevOps & Cloud: Microsoft Azure, Google Cloud Platform, CI/CD Pipelines, Docker, Git/GitHub

Tools & Platforms: n8n, Make, LangFlow, VS Code, Jupyter, Power BI, Twilio, BeautifulSoup

EDUCATION

Iqra University, Karachi, Sindh

May 2021 – Jan 2025

Bachelor of Science in Computer Science | CGPA: 3.65 / 4.0

Relevant Coursework: Artificial Intelligence, Deep Learning, NLP, Data Science, Algorithm Analysis, Data Structures, Database Management, Information Security, IoT

ADDITIONAL

- YouTube Channel (Algorithm Adventures): Published computer science courses and project tutorials for community learning
- Personal Projects: langvoice.pro (AI TTS Platform) and resumeworld.app (AI Recruitment Platform)
- Conducted workshops on AI and Agentic AI for over 100 students
